## PRIVATE LINE DEPARTMENT.

We construct and maintain Private Lines, and lease telephones and lines to parties desiring to connect two or more places, each with the other, without passing through the Central Office Exchange. We also furnish telephones for "Interior service," for use in hotels and other buildings, by which means each room may be connected with the office or janitor, and with every other room in the building.

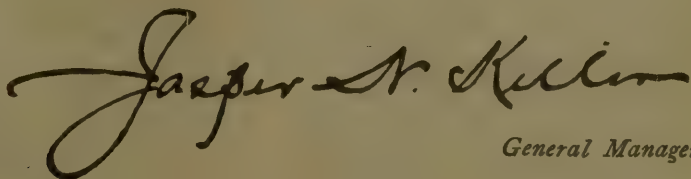

In view of the fact that telephone instruments are of necessity of delicate construction and peculiarly subject to accidental injuries and to defects which can be found and remedied only by experts, it is our opinion that the requirements of our patrons will be better satisfied by lease, thus securing to the lessees the privilege of returning defective instruments for replacement or repair, than by the sale of the limited portion of the telephone equipment which can be sold, and the assumption by the purchaser of risks of defects and the expense of repairs and depreciation.

Use of telephones and transmitters leased from this Company secures the advantage of inventions and improved instruments which are not the subject of sale.

As the style of instruments and apparatus required will depend upon the conditions under which the system is to be operated, each case should be considered separately, and for this reason we suggest that parties desiring to lease instruments for the purposes herein described make application to the general office of the Company, stating fully their requirements.

The Company will be pleased to furnish any information desired, upon application to the Executive Office, 119 Milk Street, Boston, Mass., or by calling for telephone Main, 782.

A Descriptive Catalogue will be mailed to any address upon request.

A large, elegant handwritten signature in dark ink, reading "Jasper N. Kellin". The signature is written in a cursive style with long, sweeping strokes, particularly in the first and last names.
